

Options – Base List

Bearers

Tanalised timber bearers made from 75x75mm are only to be used to raise a building in wet or damp areas. Bearers improve ventilation underneath a building, helping to let the base breathe. This allows the building to stay free from damp and avoid rotting, prolonging the overall life of your building.

Please note, bearers cannot be used to make a base level.

Eco Timber Base

Eco timber bases are made from 87x38mm CLS timber. When installed, the legs are levelled into the ground and are used across the whole of the base to support where necessary. The ground must be solid and not have more than a 10 inch fall across the whole area.

Ideal option for slightly unlevelled ground

Hardstanding Bases

Hardstanding / Slab bases can be laid to existing ground. The existing ground has to be within 10cm of level or a contractor will be needed (contractor hire is the customers responsibility).

This option will need laying at least two days before the building is due to be installed.

Size	Bearers	Eco Timber Bases	Hardstanding Bases
6x4	£21.60	£44.40	£144.00
6x5	£28.80	£55.50	£180.00
